

Notes on On foot in North Lesvos

Walk 3	
Start	There's a new sign at the start pointing to the 'Horse Track'
Walk 5	
Page 11 Update	We were a bit confused here (probably our fault). We thought it better to say 'After 2 minutes, where the track briefly levels, two paths leave the track on the left. Take the RH of these two paths. This goes diagonally towards the large valley ahead. Ignore the smaller valley nearby.'
Page 12	When entering the olive grove, the major path that you have been following leads of to the left; this is not the one you want. Shortly after this, the wall (that you go through) is now covered by a brushwood barrier and isn't obvious. The update mentions a brush wood barrier near the river bed, but it wasn't there any more.
Walk 11	
Page 30	Just before 'Another 15 minutes...' just past a small holding on the right, go across rough ground on the right to take a section of good Kalderimi that leads down to the road
Walk 12	
Page 32	At the top of the page, the 'mill wall' refers to the last mill in the L before the modern concrete weir. Towards the bottom of the page, it wasn't at all overgrown in October 2006, but perhaps it is in the Spring.
